

5 - 11 January, 2026. Bovec, Slovenia

www.imbt.si

What is IMBT?

The International Math Battle Tournament is a 1-week international team tournament in mathematics for high-school students from around the world.

At IMBT teams of young mathematicians face off in high-level, time-pressured problem-solving battles. The tournament brings together students from across the world to celebrate mathematical thinking, strategy, and international collaboration.

The main aims of IMBT are to stimulate and foster a love for mathematics, develop advanced problem-solving skills and logical thinking, and introduce students to new mathematical concepts.

IMBT 2026 is organized by Slovenian students and **DMFA Slovenije** – The Society of Mathematicians, Physicists and Astronomers of Slovenia, and will be held in Slovenia for the first time.

What is a Math Battle?

A Math Battle (mathboj) is a team-based competition usually held among high-school students and associated with math olympiads.

It's not just about solving problems — it's about thinking fast, explaining clearly, and outsmarting your opponents.

A Math Battle includes both **a problem-solving** stage and **a presentation** to the jury stage.

The problem-solving stage is a four-hour team effort aiming to solve as many problems as possible.

During **the presentation stage**, two competing teams must explain and defend their solutions, analyze the solutions of the opposing team, point out mistakes and shortcomings of the counterpart.

For solving a problem, a team receives a certain number of points (maximum 12), which can be reduced if there are mistakes or flaws. The problem can be even transferred to the opposing team if they correctly point out the mistakes of the counterpart.

Scoring is based on **accuracy and presentation**.

Math Battle procedures

Preparation: Teams receive the same set of problems and solve them in their rooms within a set amount of time (usually from after breakfast until lunch).

The battle itself:

Captains' Contest: The captains solve a problem proposed by the jury, and the team whose captain first gives the correct answer earns the right to issue a challenge on one of the unsolved problems.

Challenge and Report: One team challenges another on a specific problem. The challenging team provides a presenter, and the challenged team provides an opponent.

Round Procedure:

Report: The presenter explains the solution at the board.

Opposition: The opponent may ask questions and point out mistakes or “gaps” in the solution to the jury.

Patching “Gaps”: If the opponent finds mistakes, their team has the right to “patch” them by offering its own fix for the flaws in the report.

Role Switch: Sometimes the teams switch roles, with the presenter becoming the opponent and vice versa.

Scoring: After the round, the jury announces how many points each team earned, taking into account the correctness of the solution and the errors found.

Continuation of the Match: Teams continue challenging each other on other problems until all are considered or until one team refuses to issue further challenges.

Results: At the end of the math battle, all points are tallied, and the team with the highest score is declared the winner.

Who is eligible for participation?

IMBT
INTERNATIONAL MATH
BATTLE TOURNAMENT
www.imbt.si

High-school students, usually having experience of participating in the mathematical olympiads, from any country **aged between 15-19 years old**.

Each team consists of 4-6 participants and has **a leader**, who is **of full age** and bears responsibility for his/her team.

IMBT 2026 expects around 35 - 45 attendees including the staff.

IMBT aims to provide a challenging, creative, and inclusive event for young problem solvers to:

- Compete internationally

- Collaborate across borders

- Grow their skills and confidence in mathematics

- Represent their schools, countries, and cultures with pride

Who organizes IMBT?

IMBT is organized by a team of olympiad participants, university students and math coaches in cooperation with **DMFA Slovenije** – The Society of Mathematicians, Physicists and Astronomers of Slovenia. Our team is passionate about making high-level math accessible, fun and exciting.

Ekaterina Chizhova

student of **gymnasium
Bežigrad, Ljubljana**

**IMO 2025 honourable mention
EGMO 2025 and 2024 silver
medals**

Hugo Trebše

student at the Faculty of
Mathematics and Physics,
University of Ljubljana

**IMO honourable mention 2023
IMC silver medal 2025**

Our mission is to foster a **global community of young thinkers** who love solving problems and rising to a challenge.

Who is IMBT's jury?

IMBT's jury and **problem selection committee (PSC)** are math olympiad coaches, who are former participants, medalists and award-winners of International Mathematical Olympiad **IMO**.

All the **Slovenian members** are students/coaches at the Faculty of Mathematics and Physics, University of Ljubljana, and the **DMFA** Society of Mathematicians, Physicists and Astronomers of Slovenia.

Schedule of IMBT 2026

January 5th - 11th, 2026:

January, 5th – arrivals and opening ceremony

January, 6th – 1st day of math battles

January, 7th – 2nd day of math battles

January, 8th – hike to the Triglav mountains area

January, 9th – 3rd day of math battles

January, 10th – 4th day of math battles and closing ceremony

January, 11th - departures

Where will IMBT take place?

IMBT 2026 will take place in Bovec, a town in northwestern Slovenia's Julian Alps, famous as the "adventure capital" for activities like rafting, kayaking, and hiking on the emerald-green Soča River and within the nearby Triglav National Park.

4* Hotel Mangart is based in the heart of Triglav national park and provides great possibilities for the math tournament, including comfortable accommodation, 3x meals per day and amazing views.

Participation cost

The participation package includes transfer from/to Ljubljana airport or Ljubljana central train station to/from Bovec, accommodation at 4* Mangart hotel, tourist tax, 3 meals/day, hiking tour and other activities.

Thanks to our generous sponsor Jane Street the participation package per person for the period **5–11 January 2026** amounts only to **EUR 229**.

The participation fee may be paid either in full or in **two installments**:

A **reservation deposit** in the amount of **EUR 49** must be paid **no later than 30 November 2025**.

The **remaining balance** must be paid **no later than 15 December 2025**.

See you at IMBT!
